

Testen is dood. Lang leve de tester!

Leo van der Aalst
Software Control

Bussum, 1 oktober 2013

Testen is dood.

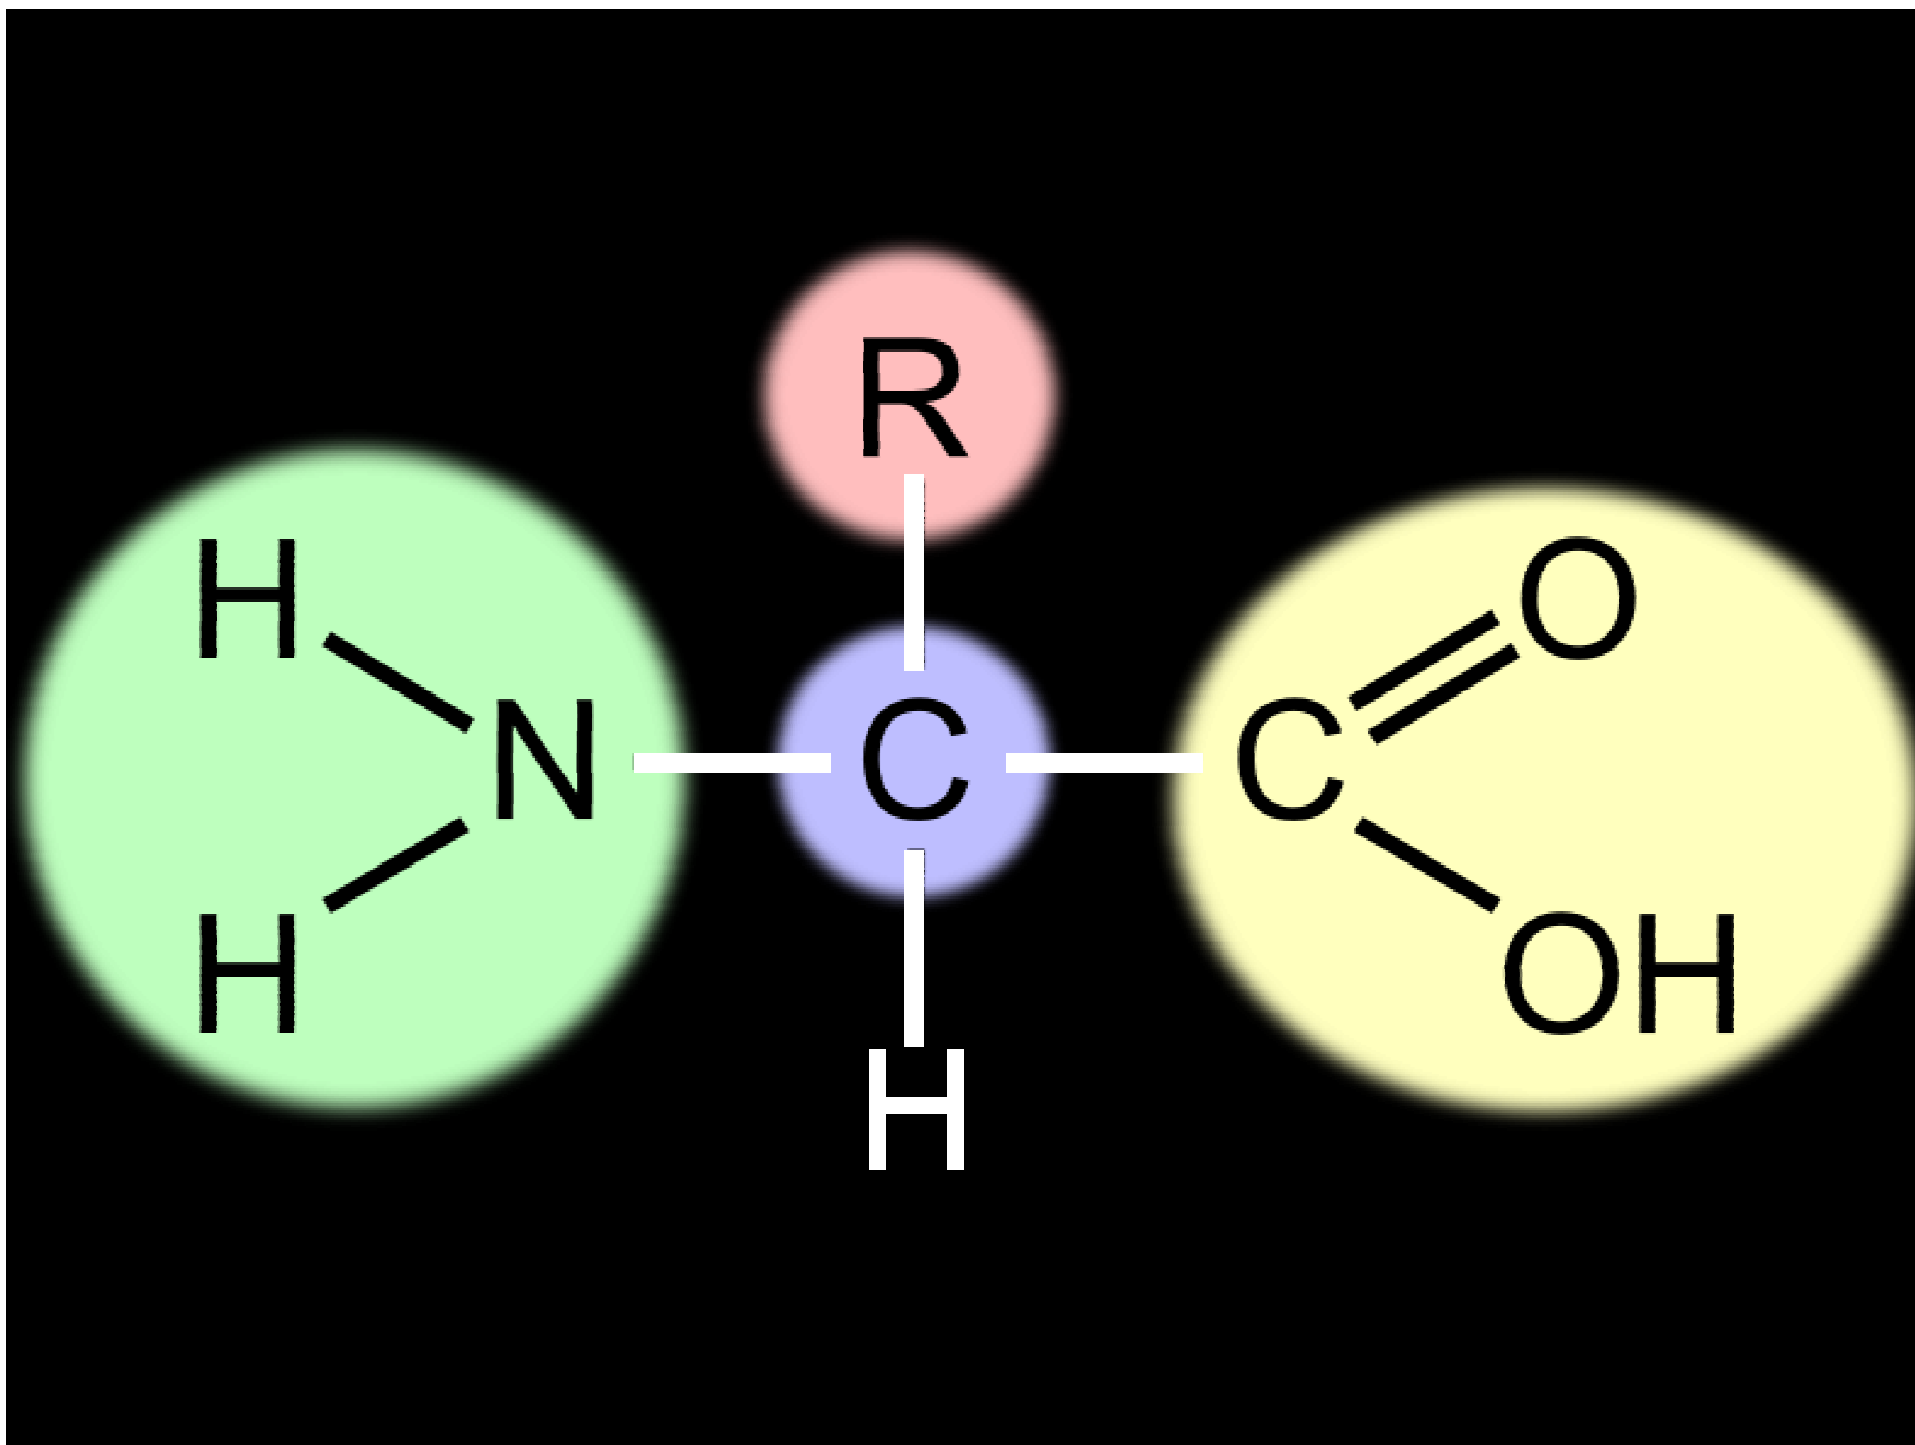

De tekst bij deze keynote is gebaseerd op mijn artikel in de Computable:

<http://www.computable.nl/artikel/opinie/development/4875709/1277180/vijf-redenen-waarom-testen-dood-is.html>

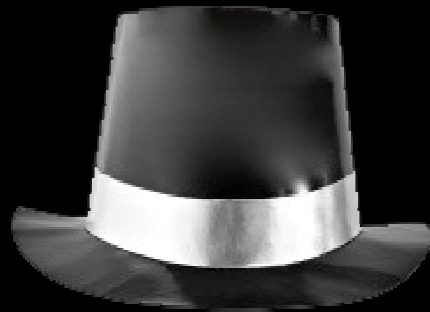

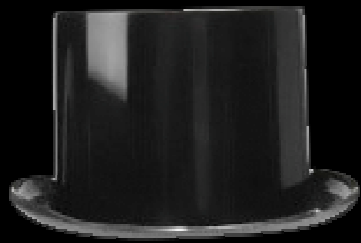

Artikel ook te lezen/downloaden via:

RELEASES WITHOUT TESTING

WILL FIX IN PRODUCTION

A person in a dark grey suit and white shirt is shown from the chest up. They are holding a black and white alarm clock with both hands. Above their head is a large, chaotic thought bubble composed of many overlapping black lines. Inside this bubble are several white line-drawn icons: a lightbulb, a circular arrow, a dollar sign, a jagged line graph, a group of stick figures, a clock face, and puzzle pieces. The background is a plain, light grey wall.

MY PERSONAL code generation

Past, Present & Future of

Testen is dood, omdat

gestructureer
tijd en

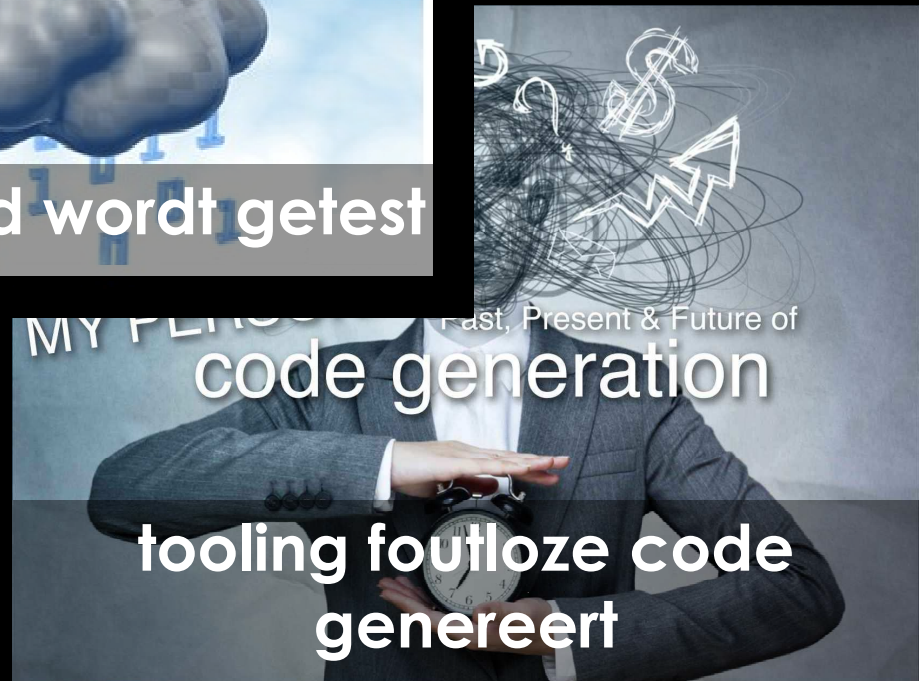

kelaanpakken
nodig maakt

alles in de cloud wordt getest

testen duurder is dan fouten
in productie verhelpen

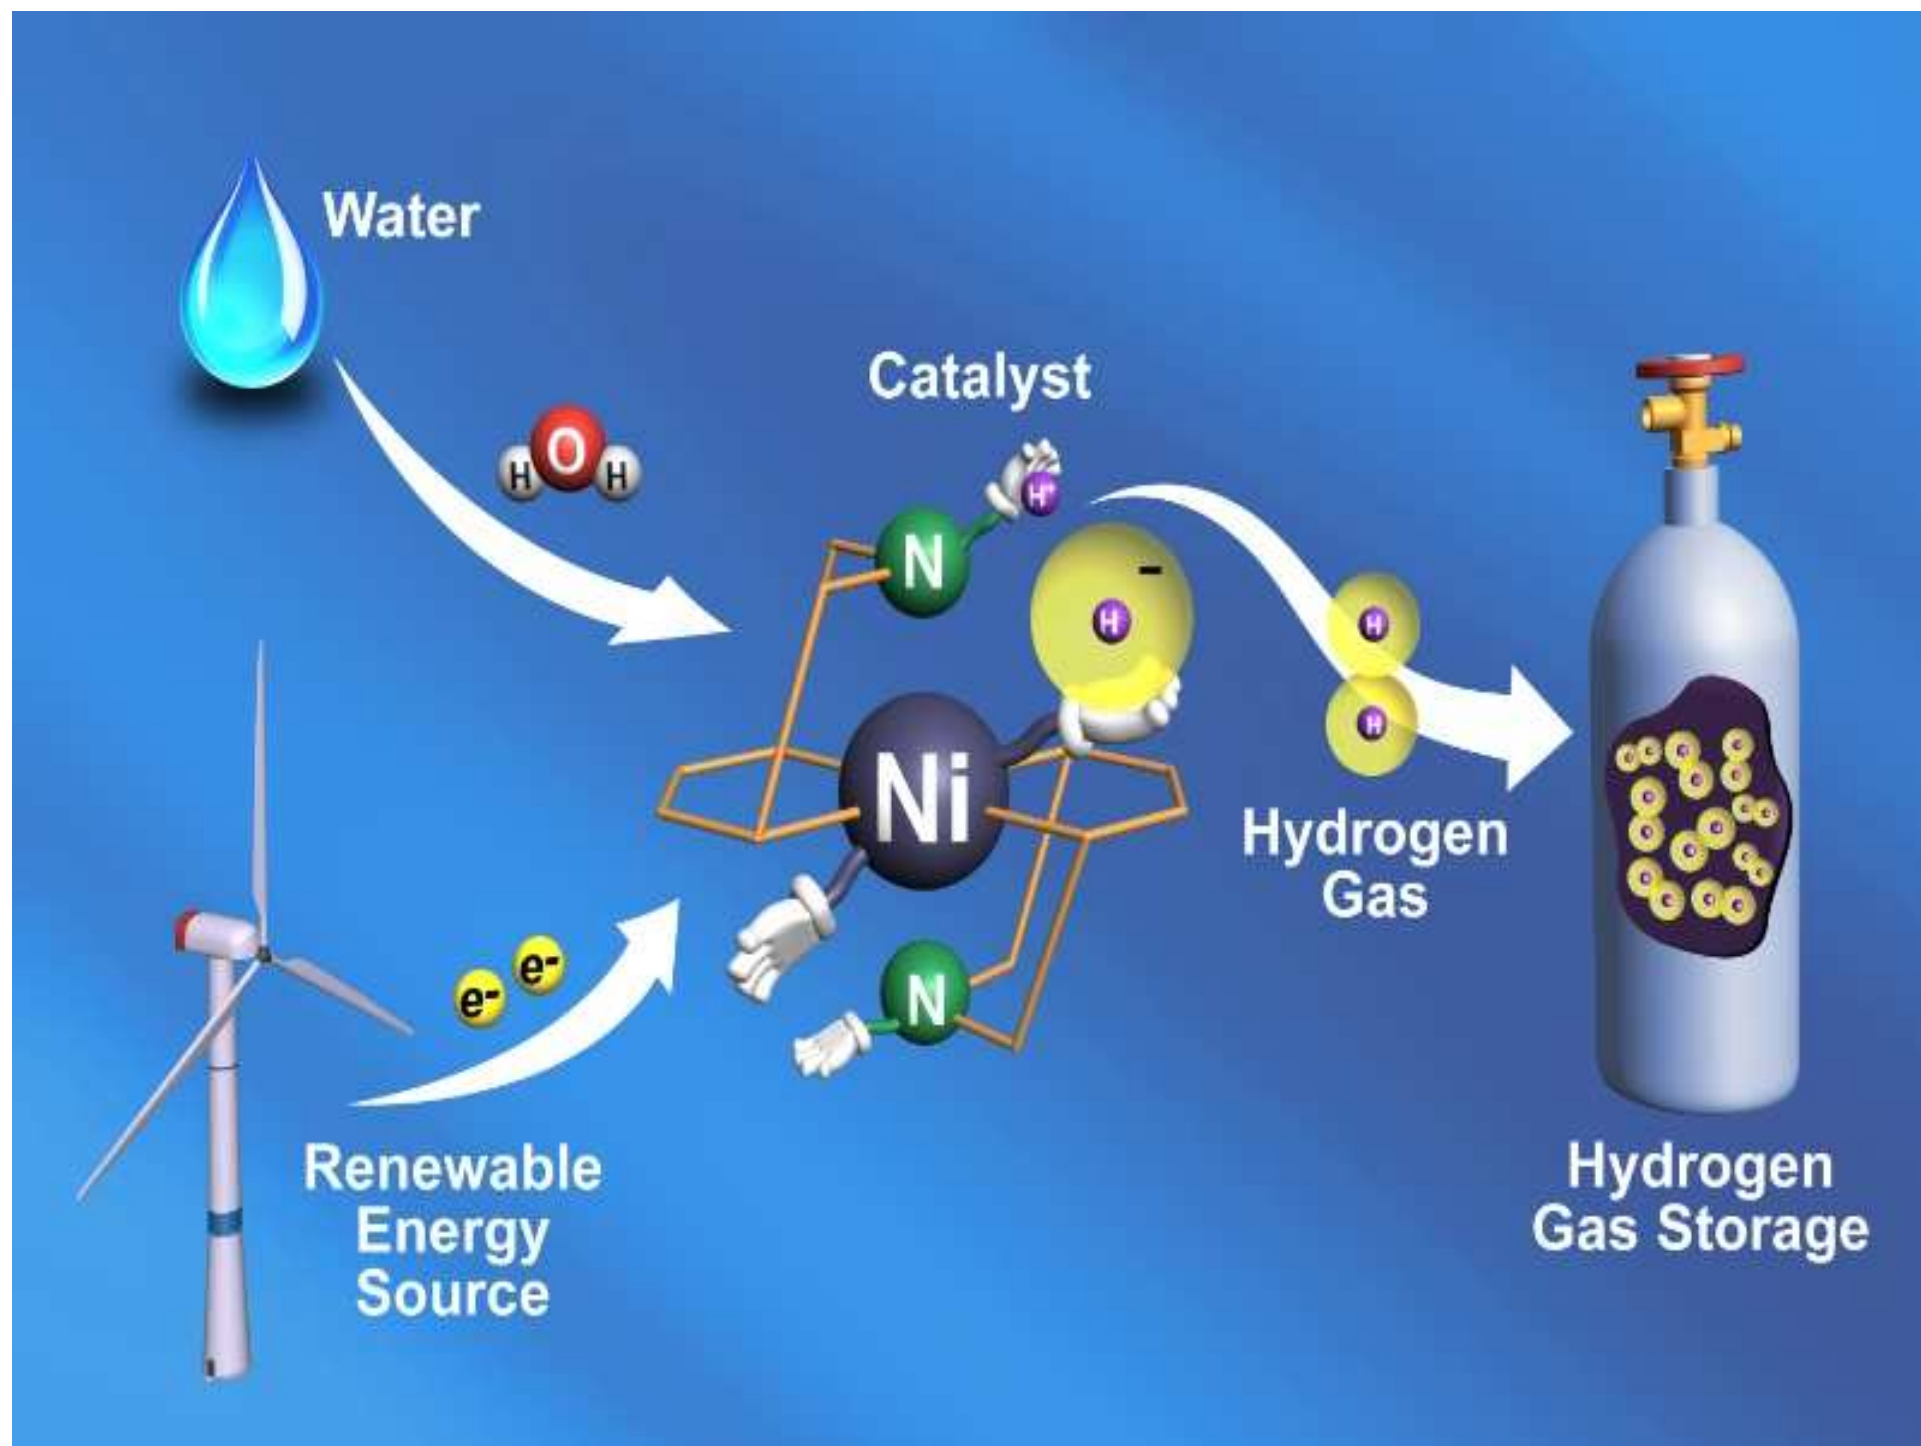

MY PERS... Past, Present & Future of
code generation

tooling foutloze code
genereert

**Testen is dood.
Lang leve de tester!**

"Vier jaar geleden is vier jaar geleden, en over vier jaar is over vier jaar!"

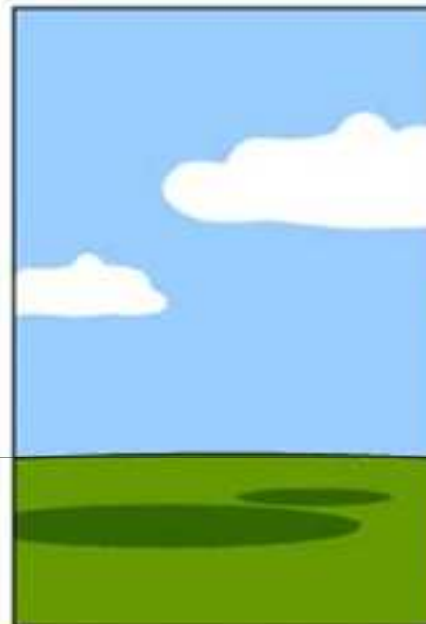

Johan Cruyff, 11-09-2013
